REVIEW AND APPROVAL STATEMENT

USAFETAC/DS-87/037, *Station Climatic Summaries, USSR and Mongolian PR*, February 1987, is approved for public release. There is no objection to unlimited distribution of this document to the public at large, or by the Defense Technical Information Center (DTIC) to the National Technical Information Service (NTIS).

This document has been reviewed and is approved for publication.

19. Abstract: A collection of summarized monthly and annual climatic data for specific locations in the Union of Soviet Socialist Republics and the Mongolian Peoples Republic. Summarized climatological elements are: percent frequency of occurrence of ceiling and visibility; means, extremes and number of days with specified values of temperature, precipitation, and snowfall; means of relative humidity, vapor pressure, dew point, pressure altitude, and cloud cover; prevailing wind direction, with mean and extreme speeds; and number of days with thunderstorms and fog.
20. Distribution/Availability of Abstract: Same as report

SUMMARY

The "Station Climatic Summary" series (formerly known as the "AWS Climatic Briefs"), is assembled and published by the USAF Environmental Technical Applications Center (USAFETAC). The series comprises regional collections of short climatological data summaries for specific stations worldwide. A typical data set for a given station might consist of an "AWS Climatic Brief" (a one-page form prepared by USAFETAC/OL-A, sometimes with a one-page addendum) or an "AWS Climatic Brief for Limited Duty Stations" (another one-page form, also prepared by USAFETAC/OL-A). An "Operational Climatic Data Summary," normally four pages of climatic data prepared by USAFETAC/ECR, might constitute another data set for certain stations. A two-page "Operational Climatic Data Summary Supplement," also prepared by USAFETAC/ECR, may supplement an AWS Climatic Brief" or an "AWS Climatic Brief for Limited Duty Stations." The data types are explained below. See AWSR 105-10 and USAFETAC Pamphlet 105-3 for more detailed descriptions.

AWS Climatic Brief: A computer-prepared summary of monthly and annual climatic data for stations with a 24-hour, 7-day observing function. OL-A creates a new "brief" whenever it prepares a new RUSSWO (Revised Uniform Summary of Surface Observations) or updates an existing one. New RUSSWOS are prepared whenever an initial 5-year period of record becomes available, and existing RUSSWOS are updated whenever 5 additional years of data are added to the original database.

AWS Climatic Brief for Limited Duty Stations: Also computer-prepared by OL-A for stations that do not have 24-hour, 7-day observing functions. This product differs from the first in that it is prepared along with (and using data from) a LISOCS (Limited Surface Observation Climatic Summary), rather than from a RUSSWO. Like RUSSWOS and their "briefs," new LISOCs (and accompanying "briefs") are prepared whenever there is a 5-year period of record; both are updated when a new 10-year period of record becomes available. But because they are for "limited observing" stations, data is taken only from actual hours of operation. The data might be supplemented, however, by data from others sources (such as earlier periods of record, data from nearby stations, or published data from other sources) that have been combined by a climatologist. "All hours" data are not available in these briefs.

Operational Climatic Data Summary: A four-page typewritten summary of monthly and annual climatic data prepared by USAFETAC/ECR, when the creation of a standard "climatic brief" is impractical because of lack of data (period of record too short for RUSSWO creation, no "summary of day" data available) or to answer a short-notice request. ECR normally uses the latest 10-year period of record (hourly data), more if available. These data are supplemented from other sources such as earlier periods of record, data from contemporary and/or earlier stations, and published data from other sources. All sources are given in the legend. A two-page "Operational Climatic Data Summary Supplement" may follow either of the two preceding data types.

Normally, only one of the three main products above is prepared for a given station; however, when a station has both an "AWS Climatic Brief" and an "Operational Climatic Data Summary," users should decide (from data source and POR) which is the better product for a particular application.

All the above data sets normally include monthly and annual climatic data for at least the following elements: Temperature (means and extremes, daily and monthly); relative humidity, vapor pressure, and dew point; pressure altitude, surface winds, precipitation, and mean cloud cover; thunderstorm and fog occurrence (mean number of days); and flying weather by ceiling and visibility categories.

Address questions or comments to USAFETAC/ECR, Scott AFB, IL 62225-5438, Autovon 576-3465.

Regional collections of climatic summaries are published as USAFETAC "data summaries"--numbered as shown below--for each of eight major geographical areas. Each collection is revised when and as required. When a revision is issued, the "DS" end number remains the same (i.e., North America is 031, Latin America is 032, Europe is 033, and so on); only the year of issue changes. The map shows regional boundaries corresponding to each numbered volume.

USAFETAC/DS-XX/031 North America

USAFETAC/DS-XX/035 Asia

USAFETAC/DS-XX/032 Latin America

USAFETAC/DS-XX/036 Peoples Republic of China*

USAFETAC/DS-XX/033 Europe

USAFETAC/DS-XX/037 USSR and Mongolian
Peoples Republic

USAFETAC/DS-XX/034 Africa

USAFETAC/DS-XX/038 Antarctica, Australia, and Oceania

REMARKS (ENTIRE SUMMARY IS SYNOPTIC 3 HRLY OBS) JAN 59-DEC 68.

EXTREME VALUES FROM OLD AND NEW "N" SUMMARIES FOR: 1949-58; 1959-68.

MAX SNOW DEPTH INSTEAD OF SNOW FALL.

CLOUD FREQUENCIES ARE BASED ON LOWEST CLOUD WHEN TOTAL CLOUD AMOUNT IS ≥ 50%.

DUE TO CODING PRACTICES, THICK HAZE MAY BE INCLUDED.
